The screenshot shows the Visual Studio Code editor with the file explorer on the left displaying the project structure. The main editor window shows the code for `M_Admin.php`. The code includes a class `M_Admin` extending `CI_Model` with two methods: `getTotalPemasukan()` and `getAllUser()`. The terminal at the bottom shows the PHP version and environment details.

```
1 <?php
2 defined('BASEPATH') or exit('No direct script access allowed');
3
4 class M_Admin extends CI_Model
5 {
6     public function getTotalPemasukan()
7     {
8         $this->db->select('order_id, totalBiaya');
9
10        $this->db->group_by('order_id');
11
12        $data = $this->db->get('orders')->result();
13        $total = 0;
14
15        if ($data) {
16            foreach ($data as $dt) {
17                $total += $dt->totalBiaya;
18            }
19        }
20
21        return $total;
22    }

The screenshot shows the Visual Studio Code editor with the file explorer on the left displaying the project structure. The main editor window shows the code for `M_Front.php`. The code includes a class `M_Front` extending `CI_Model` with three methods: `getKategori()`, `getPopularProducts()`, and `getProductKategori()`. The terminal at the bottom shows the PHP version and environment details.

```
1 <?php
2 defined('BASEPATH') or exit('No direct script access allowed');
